Current Focus

I am taking on projects that challenge me as a developer and give me a chance to add to my knowledge base.

My current focus is on extending my understanding of WordPress Theme Development, PHP, and JavaScript.

Primary Skills

My skills include HTML, modular CSS (Sass), jQuery, and responsive development. I have experience with WordPress, Bootstrap, Git, JavaScript, PHP, and MySQL.

I know my way around Photoshop and Illustrator and am familiar with basic design principles.

Work Experience - Freelance

October 2015 - January 2016

- worked on a vehicle dealership website using Craft CMS, creating custom fields, categories, and tags, and creating templates using Twig
- worked on making designs responsive, created icon assets, did research and collected data on user statistics, helped with marketing and advertising

March 2016

- worked on a site of educational articles, making it mobile responsive and rewriting outdated HTML code using semantic markup

May 2016 - Present

- Worked on a project for an EMS site gaining more experience with Bootstrap and using PHP and MySQL to capture and output form data
- Worked on multiple WordPress sites, adding content and fixing theme issues using custom CSS. Worked on finding CSS solutions compatible with all browsers and multiple versions.
- Work as a contractor for *White Buffalo Websites* - whitebuffalosolutions.com

Volunteer Experience

- I volunteer for the local meetup group Girl Develop It as a Teacher's Assistant for their Front-End Developer Series.
